

Initial CPP Application Review Form

Recently Accepted CEHs Topics by Category

Adopted April 2026

Generally, these descriptions and topics are approved for CPP initial applications, renewals, and recertifications. This is not an exhaustive list and is subject to change without notification. Long running courses, workshops, trainings, and conferences have been known to change content overtime necessitating adjustments on the part of the PSCBW in accepting and approving CEHs.

Training or education on the following topics

Pharmacology and/or Drug Harm Reduction Education

- Drug Pharmacology including but not limited to Alcohol, Cannabis, Vapes and other Tobacco products, Amphetamines, Opioids, etc., substance use effects on the human body.
- Harm reduction is a broad term that applies to policies, programs, and practices that aim to minimize the health, social, and economic consequences of substance misuse, such as environmental and economic challenges, access to drugs and lack of awareness of community resources, lack of access to treatment, providing safer conditions to manage substance misuse, etc. Drug harm reduction approaches are aimed at reducing the harmful effects of substance misuse. Acceptable CEHs will contain the term of *harm reduction* in the title or content will address substance misuse specifically.
